Professional Summary

Product Manager with experience across consumer and platform products. Led **0→1** launches, **conversion** optimization initiatives, customer research, and **workflow automation** at Cars24. Interested in building consumer products focused on activation, engagement, retention, and monetization through data-driven experimentation

Education

Netaji Subhash University of Technology (NSUT)

Aug 2021 – May 2025

B.Tech in Electrical Engineering

N.K. Bagrodia Public School, Dwarka

Apr 2018 – May 2020

CBSE – Class XII

Experience

Associate Product Manager | Cars24

Aug 2025 – March 2026

- Led product initiatives for Spaceport, Cars24's internal order lifecycle platform serving **600+ operations users**, **reducing RC** transfer order completion **TAT** by **20%** through workflow redesign, automation and bottleneck elimination.
- Digitized 4** core business workflows onto an internal platform by replacing email- and form-based operations with **structured workflows**, **improving operational visibility, governance, and execution efficiency**.
- Redesigned the order creation workflow** by moving case-type classification upstream, eliminating downstream operational dependencies and enabling **automated pricing** earlier in the order lifecycle.
- Built a rule-based pricing engine leveraging **Surepass API** and configurable business rules, replacing manual quote generation and **reducing pricing turnaround** from **90 minutes to near-instant** while improving pricing consistency.
- Productized** discount approval workflows for **300+** monthly exception orders (**3% of 9K volume**), replacing email-based approvals with role-based routing and audit trails to **reduce approval turnaround** while improving governance and approval visibility.
- Unified** financing workflows across Loans24 and Spaceport for **4.5K** monthly financed-car orders, **eliminating manual** status handoffs and creating a single workflow across lead creation, disbursal updates, and order tracking.

Product Management Intern | Cars24

Feb 2025 – Aug 2025

Product Launch and Conversion Strategy

- Led the **0→1 launch** of PDI Promise, a trust-backed guarantee product for used-car inspections, driving a **10% increase** in inspection booking conversion by addressing buyer concerns around hidden vehicle risks.
- Conducted **400+** customer interviews across converted and dropped users to **identify trust gaps** in the used-car buying journey, uncovering demand for deeper vehicle history and risk insights.
- Redesigned** key stages of the **inspection booking funnel** by surfacing trust signals, vehicle risk indicators, and value communication, improving clarity around the inspection proposition.

Projects

InsightFlow AI | AI-Powered User Research Platform

- Designed and prototyped** an AI-powered user research platform capable of transforming **100+** interview transcripts into structured themes, sentiment signals, feature requests, and executive summaries through an automated analysis pipeline.
- Architected** a workflow integrating CRM ingestion, telephony APIs, speech-to-text, LLM orchestration, and analytics dashboards, eliminating **5+** manual research and synthesis steps for product teams.

School Meal Tracker-Feeding India [Figma] [PRD]

- Designed end-to-end Figma prototype** for a school attendance and **meal governance app** serving school admins, kitchen partners, and Feeding India ops teams
- Defined user flows and edge cases** covering partial holidays, class-level scope, recurring holidays, and absent teacher handover.
